

Botium Toys: Scope, goals and risk assessment report

Scope and goals of the audit

Scope: The entire security program at Botium Toys. This includes their assets like equipment, devices, employees, their internal network and their systems.

Goals: Assess existing assets and complete the controls and compliance checklist to determine which controls and compliance best practices that need to be implemented to improve Botium Toys' security posture.

Current Assets

Assets managed by the IT Department include:

- On-premises equipment for in-office business needs
- Employee equipment: end-user devices (desktop/laptops, smartphones, tablets), remote workstations, headsets, cables, keyboards, mice, docking stations, surveillance cameras, webcams, seats, etc.
- Storefront products available for retail sale on site and online; stored in the company's adjoining warehouse.
- Management of systems, software, and services: accounting, telecommunication, database, security, e-commerce, and inventory management.
- Internet access.
- Internal network.
- Data retention and storage.
- Legacy system maintenance: end-of-life systems that require human monitoring.

Risk Assessment

Risk Description

Currently, there is inadequate management of assets. Additionally, Botium Toys does not have all the proper controls in place and may not be fully compliant with U.S. and international regulations and standards.

Control Best Practices

The first of the five functions of the NIST CSF is Identify. Botium Toys will need to dedicate resources to identify assets so they can appropriately manage them. Additionally, they will need to classify existing assets and determine the impact of the loss of existing assets, including systems, on business continuity.

Risk Score

On a scale of 1 to 10, the risk score is 8, which is high. This is due to a lack of control and adherence to compliance with best practices.

Additional Comments

The potential impact from the loss of an asset is rated as medium, because the IT department does not know which assets would be at risk. The risk to assets or fines from governing bodies is high because Botium Toys does not have all the necessary controls in place and is not fully adhering to the best practices related to compliance regulations that keep critical data private/secure. Please review the following bullet points for specific details.

- Currently, all Botium Toys employees have access to internally stored data and may be able to access cardholder data and customers' PII/SPII.
- Encryption is not currently used to ensure confidentiality of customers' credit card information that is accepted, processed, transmitted, and stored locally in the company's internal database.
- Access controls pertaining to least privilege and separation of duties have not been implemented.
- The IT department has ensured availability and integrated controls to ensure data integrity.
- The IT department has a firewall that blocks traffic based on an appropriately defined set of security rules.
- Antivirus software is installed and monitored regularly by the IT department.

- The IT department has not installed an intrusion detection system (IDS).
- There is no disaster recovery plan currently in place, and the company does not have backups of critical data.
- The IT department has established a plan to notify E.U. customers within 72 hours if there is a security breach. Additionally, privacy policies, procedures, and processes have been developed and are enforced among IT department members/other employees, to properly document and maintain data.
- Although a password policy exists, its requirements are nominal and not in line with current minimum password complexity requirements.
- There is no centralized password management system that enforces the password policy's minimum requirements, which sometimes affects productivity when employees/vendors submit a ticket to the IT department to recover or reset a password.
- While legacy systems are monitored and maintained, there is no regular schedule in place for these tasks and intervention methods are unclear.
- The store's physical location, which includes Botium Toys' main offices, store front, and warehouse of products, has sufficient locks, up-to-date closed-circuit television (CCTV) surveillance, as well as functioning fire detection and prevention systems.

Controls and compliance checklist

Controls assessment checklist

Yes	No	Control
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Least Privilege
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Disaster recovery plans
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Password policies
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Separation of duties
<input checked="" type="checkbox"/>	<input type="checkbox"/>	Firewall
<input type="checkbox"/>	<input checked="" type="checkbox"/>	Intrusion detection system (IDS)

- | | | |
|-------------------------------------|-------------------------------------|---|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Backups |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Antivirus software |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Manual monitoring, maintenance, and intervention for legacy systems |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Encryption |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Password management system |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Locks (offices, storefront, warehouse) |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Closed-circuit television (CCTV) surveillance |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Fire detection/prevention (fire alarm, sprinkler system, etc.) |

Compliance checklist

Payment Card Industry Data Security Standard (PCI DSS)

- | Yes | No | Best practice |
|--------------------------|-------------------------------------|--|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Only authorized users have access to customers' credit card information. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Credit card information is stored, accepted, processed, and transmitted internally, in a secure environment. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Implement data encryption procedures to better secure credit card transaction touchpoints and data. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Adopt secure password management policies. |

General Data Protection Regulation (GDPR)

- | Yes | No | Best practice |
|--------------------------|-------------------------------------|---|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | E.U. customers' data is kept private/secured. |

- | | | |
|-------------------------------------|-------------------------------------|---|
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | There is a plan in place to notify E.U. customers within 72 hours if their data is compromised/there is a breach. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Ensure data is properly classified and inventoried. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Enforce privacy policies, procedures, and processes to properly document and maintain data. |

System and Organizations Controls (SOC type 1, SOC type 2)

- | Yes | No | Best practice |
|-------------------------------------|-------------------------------------|--|
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | User access policies are established. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Sensitive data (PII/SPII) is confidential/private. |
| <input checked="" type="checkbox"/> | <input type="checkbox"/> | Data integrity ensures the data is consistent, complete, accurate, and has been validated. |
| <input type="checkbox"/> | <input checked="" type="checkbox"/> | Data is available to individuals authorized to access it. |
